Reasons for Allowance

1. Claims 1, 5-12 and 15-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Kretschmann (U.S. Patent No. 6,167,464) discloses a mobile human machine interface (HMI) for a monitoring operation of a spatially distributed control system in a factory. The portable HMI has the ability to determine its location with respect to the machines in the factory for monitoring or troubleshooting only to the proximate machines. Kretschmann does not teach the HMI identifies all the machines with which communication has been established and determines a spatial distance of the machines, wherein a nearest machine is detected and uniquely displayed on a graphics display; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

And Naito (U.S. Patent No. 5,867,110) discloses an information reporting system including a portable terminal that can detect its current position and adapted to transmit the position information data indicative of the current position detected by the current position detection means. The transmitted information could include text, images or a type multimedia data. Naito does not teach the portable terminal identifies all automation components with which communication has been established and determines spatial distance of the automation components; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

Neither of these references taken either alone or in combination discloses a method and device for operating and/or observing automation components having all the claimed features of applicant's instant invention, specifically including: a data processing device that identifies all

automation components with which communication has been established and determines a spatial distance of said automation components from a location of the device for wireless data communication, wherein a nearest machine is detected and uniquely displayed on a graphics display. Also, there is no motivation to combine the Kretschmann reference with the Naito reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
